

Only emergency measures now have a chance of preventing climate disaster' George Monbiot

The Energy Debate

A DVD Pack with 6 Units
Key Stages 4-5

- Energy Crisis
- Nuclear or Not?
- Clean Coal
- Renewables
- Zero Carbon
- Energy Efficiency

This debate involves every single one of us. What is our energy future? What are the options? Is nuclear power the answer? Will we have a say? This is an essential resource for Citizenship and Critical Thinking.

In **The Energy Debate** the basic facts and different viewpoints are presented clearly and concisely by people directly involved in the energy sector. It was shot on location in the UK.

Can renewables like wind, wave and thermal power deliver?

Can fossil fuels be cleaned up and made more efficient?

Surely nuclear with it's low carbon output is just what we need?

Couldn't we use a lot less energy? Are we ready?

- short video units
- linked activity sheets

The Energy Debate

DVD Pack with 6 Units

Contents: DVD 6 units
Worksheets: 14 pages
Suitability: KS 4-5
Price: £29.99 ex Vat

The Energy Debate DVD is divided into 6 separate units. The different options are spelled out clearly and succinctly.

Each unit is linked to printable questions & activities on the DVD.

UNIT 1 Energy Crisis

Climate change is provoking heated debate and discussion. The world is divided on the way forward. What exactly are the options?

Supply options

UNIT 2 Nuclear or not - 3 parts

Nuclear power is a big hitter in the energy debate. But it has never lived up to its promise and it comes with radiation fears, unmanageable waste and a very toxic legacy. The industry and its critics go head to head.

UNIT 3 Clean coal

Fossil fuels provide the bulk of our energy needs but they are destroying our climate. Can they be cleaned up?

UNIT 4 Renewables

Harnessing free energy as an answer to global energy crisis would seem to be a no brainer. Is it a false promise? Can it deliver?

Demand options

UNIT 5 Zero carbon

Small scale, carbon neutral solutions for our home energy needs are already widespread. Are they practical, reliable and affordable? This unit features the BedZED housing project.

UNIT 6 Energy efficiency

Saving energy and using what we have more efficiently may be the 'silver bullet'. But is there any commercial interest in **not** using energy?

Also available

Content: 13 profiles
Worksheets: 30pp
Suitability: KS 4-5
Price: £29.99 ex Vat

THE ENERGY GENERATION

DVD Pack - includes 30 pages of activity sheets

Jobs and careers in the energy sector

KS 4-5

Thirteen DVD profiles of people working in the energy sector, one of the most dynamic employment sectors in the UK.

Set in the workplace, this is working life through the voices of those that work there. Young women and men just starting out and those with a lifetime in the sector, describe their jobs and how they see the future.

This is a must see for anyone thinking about their career. People featured tell you about:

- doing interviews
- finding the right job
- being creative in science
- women in engineering
- life-time learning
- leadership
- social responsibility

Interactive questions and activities **included on DVD.**

Suitable for **Careers** and **Business Studies.**
